SUMMARY

Java and Python programming background, with projects covering account transactions and employee payroll. Customer service and administrative experience coordinating with technical staff, supporting customers, and keeping records organized.

PROJECTS

Java Bank Account Simulator

CSC223

- Simulates deposits, withdrawals, and balance checks so users can track a sample account's balance.
- Rejects nonpositive amounts and overdrafts, keeping the balance unchanged when a transaction is refused.

Employee Payroll Model

CSC223

- Calculates pay for full-time and part-time employees using salary, bonus, and hourly pay rules.
- Displays each employee's ID, name, and pay together so results are easy to review.

SKILLS

Languages: Java, Python

Programming: Object-oriented programming, exception handling, arrays, file processing

Tools: Eclipse, Microsoft Word, PowerPoint, Excel (basic), Google Workspace

Professional skills: Customer communication, coordination with technical staff, recordkeeping

EXPERIENCE

Sales & Customer Service Assistant

June 2023 - August 2023

Cabletron Network Systems Limited | Westmoreland, Jamaica

- Supported customer service and billing inquiries, helping customers understand products, services, and next steps.
- Coordinated requests with sales and technical staff and organized client records to support accurate handoffs.

Administrative Assistant (Seasonal)

November 2022 - January 2023

Savanna-la-Mar Tax Office | Westmoreland, Jamaica

- Assisted customer intake and explained service procedures to support an orderly flow during tax season.
- Prepared tax documents and maintained filing systems so accountants could access records for processing.
